

## myPOS Package Activation Guide

How to activate my new myPOS  
Device and myPOS Business Card

Before you start the activation, you need:

- Your mobile phone  
(able to receive SMS)
- Internet browser  
to access [www.myPOS.eu](http://www.myPOS.eu)
- Your myPOS Device  
connected to Internet  
via Bluetooth\*, Wi-Fi\*\* or SIM card\*\*\*

\* In order to connect your myPOS Device via Bluetooth you need to download and install myPOS Bluetooth Service App on your internet enabled smart phone running or Android 4.2 (or higher).

\*\* You can connect your myPOS Device directly to a Wi-Fi router or a hotspot (Android 4.2/Windows Phone 8.0 or higher versions).

\*\*\* In order to connect your myPOS Device via SIM card you need to have a SIM card with activated data connection service. If your SIM card is micro or nano, you will need a SIM adapter to the standard size.

# Go to [www.myPOS.eu](http://www.myPOS.eu) and follow the instructions for activation

## Step 1

**Register**  
your myPOS  
e-money account

## Step 2

**Activate**  
your myPOS  
Device

## Step 3

**Activate**  
your myPOS  
Business Card\*

\* Activation procedure may differ in some cases of sales via a Distributor.

Note: Your box may not include myPOS Business Card in some cases.

- You may also activate your myPOS Device after you log into your Account in the menu [Devices > Activate your device](#) and follow the steps
- You may also activate your myPOS Business Card after you log into your Account in menu [Cards > Activate your card](#) and follow the steps

myPOS Europe Ltd. reserves the right to make modifications to the activation procedure. In case of problems with the activation, please contact Customer Support at [support@mypos.eu](mailto:support@mypos.eu). We will contact you within 48 hours.

Download for free myPOS Mobile App for Android or iOS to manage your POS devices, security settings, card limits, alerts and to keep track of all your transactions
